Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

VOLUME XXVI SEPTEMBER, 1919 NUMBER 7

THE AMERICAN MATHEMATICAL MONTHLY

OFFICIAL JOURNAL OF

THE MATHEMATICAL ASSOCIATION OF AMERICA

DEVOTED TO THE INTERESTS OF COLLEGIATE MATHEMATICS

COMMITTEE ON PUBLICATIONS

R. C. ARCHIBALD W. A. HURWITZ H. E. SLAUGHT

ASSOCIATE EDITORS

HENRY BLUMBERG B. F. FINKEL HELEN A. MERRILL
DANIEL BUCHANAN D. N. LEHMER U. G. MITCHELL
E. L. DODD H. P. MANNING E. J. MOULTON
OTTO DUNKEL R. B. McCLENON D. E. SMITH

PUBLISHED BY THE ASSOCIATION

THE AMERICAN MATHEMATICAL MONTHLY, FOUNDED IN 1894 BY BENJAMIN F. FINKEL, WAS PUBLISHED BY HIM UNTIL 1913. FROM 1913 TO 1916 IT WAS OWNED AND PUBLISHED BY REPRESENTATIVES OF FOURTEEN UNIVERSITIES AND COLLEGES IN THE MIDDLE WEST

ISSUED MONTHLY EXCEPT IN JULY AND AUGUST

LANCASTER, PA., AND PROVIDENCE, R. I.

Entered at the Post Office at Lancaster Pa., as Second Class Matter

$3.00 a Year **Single Copies, 35 cents**

CONTENTS

Third Annual Meeting of the Kentucky Section 279

The National Committee on Mathematical Requirements 279

A Theory and Generalization of the Circular and Hyperbolic Functions. By Professor A. F. FRUMVELLER 280

A Proof of a Theorem of Compound Probabilities. By Professor UGO BROGGI 288

Bits of History about Two Common Mathematical Terms. By Professor G. A. MILLER 290

QUESTIONS AND DISCUSSIONS: Questions by Professor Harris Hancock; Discussions—"The Complex Quantity in Algebra" by Professor W. W. JOHNSON, and "On Teaching of Logarithms" by Professor R. B McCLENON 291

RECENT PUBLICATIONS: Reviews—"Hindu Science" by Professor L. C. KARPINSKI, etc.; Notes; Articles in Current Periodicals; American Doctoral Dissertations 298

UNDERGRADUATE MATHEMATICS CLUBS: Club Activities; Club Notes 308

PROBLEMS AND SOLUTIONS 311

NOTES AND NEWS 322

EDITORIAL CORRESPONDENCE AND BOOKS FOR REVIEW should be addressed to the EDITOR-IN-CHIEF, R. C. ARCHIBALD, Brown University, Providence, R. I.

BUSINESS CORRESPONDENCE should be addressed to the SECRETARY-TREASURER of the Association, W. D. CAIRNS, 27 King Street, Oberlin, Ohio.

For upper-class and graduate students in American colleges and universities

PROJECTIVE GEOMETRY

Volume I

By OSWALD VEBLEN, *Princeton University* and J. W. YOUNG, *Dartmouth College.*

Volume II

By OSWALD VEBLEN

These two books give an exposition of the principles of geometry, taking account of certain modern concepts and methods which have not yet been given as important a place in treatises as they have attained in current thought.

Volume I, which is already favorably known to American mathematicians, treats projective geometry as a logical structure based upon explicitly stated assumptions.

Volume II completes the program outlined in the first volume. While the first volume deals with the most general parts of the subject, the second is concerned with the more important special branches of geometry obtained by adding further assumptions or by considering particular subgroups of the projective group.
